

Providing Environment-Friendly Technologies and Products

Pipe and Fluid Systems Engineering Consolidated Division	
Recycling of FW pipes	10
Plant converting waste plastics into oil (completion of Dohoh oil converting center)	11
Electric power generation equipment using pump with reverse rotation impeller	11
Farm and Industrial Machinery Consolidated Division	
Mini-excavator ([KINGLEV]series)	12
The engines complying with exhaust gas regulations (V3300)	12
Radio-controlled mower (AMX-7)	13
New "riz-frais" system (KBM-3P-45).....	13
Environmental Control Plant Consolidated Division	
Dioxin Decomposition Units	14
Sewage sludge circulation fluidized bed incineration system	15
Sludge recycling treatment center (Resource recoveryand recycling system)	15
Gasification and melting system	15
Housing Materials and Utilities Consolidated Division	
Joukaso using membrane filter	16
Materials Division	
Drainage cast iron pipes	17
Technology Development Headquarters	
Ah imunoassay for toxic detection of dioxins	19
CFC-free heat pump system complying with multiple fuels	19
The development of microporous materials	19
Impurities sorting equipment for plastic pellets (PLATON)	20
High stain-rate-super-plastic forming and the development of its products	20
Special drainage Super L	21
The development of the recycling technology for the waste F.R.P. bathtubs	21
Results of environment-friendly and creative activities	
Development of the environment-friendly technologies and products by division	22
Environmental considerations at the design and development stages	
An example of LCA	23
An example of packing improvement (Kubota digital scales)	24
An example of saving energy, recycling design and noise reduction etc. (automatic vending machine)	24
